

Stainless Steel Wall Mounted Solar LED Lanterns

Simple to install - no wiring required!

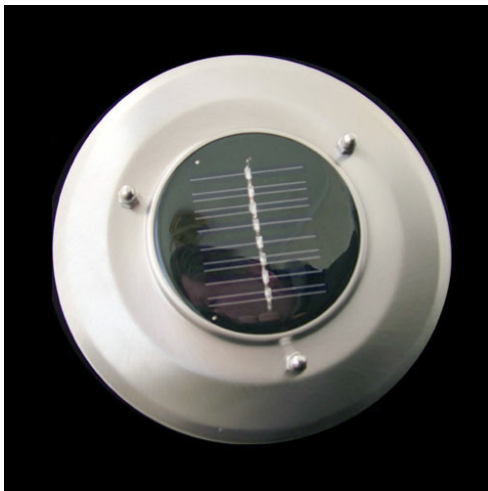

- Stainless steel
- 2 x white color LED
- 2 x AA NI-MH/NI-CD battery
- Crystalline solar panel
- With ON/OFF switch
- 6 - 8 hours Light Time

These Stainless Steel Solar Powered Lanterns convert energy from the sun into electricity at no cost. The lanterns have rechargeable batteries inside which save the energy converted by the solar panels on the top and use it to power the long life, super bright LED lights when it is dark.

When switched "on" the solar lights will automatically switch on in the evening and off again in the morning.
